

# REGUPOL CHAMPION AG

NOW AVAILABLE WITH  
4.0 TECHNOLOGY

With the implementation of our new 4.0 technology we achieve the cost-saving elimination of a complete work step in the installation of our **REGUPOL champion** versions of running tracks.

A world innovation in the field of sandwich running track systems.

The constant physical properties of our **REGUPOL champion tracks** due to our manufacturing technology remain unchanged.

In addition, the adherence of the wearing layer to the **REGUPOL** base mat improves significantly.

You will find all information on the new installation technology in this flyer or on our website:

 **REGUPOL**

# UNIQUE SOLUTION

## FOR THE CONSTRUCTION OF SANDWICH TRACKS

We've been building **REGUPOL running tracks** for over five decades. At that time we were among the first! Worldwide.

Now we have again succeeded in a coup. The application of our new 4.0 technology eliminates a complete work step that has been indispensable for sandwich tracks of all types and all manufacturers:

The sealing of the base mat in order to prevent the self-leveling PUR wear layer from penetrating during installation is completely omitted. And that without changing the physique of the **REGUPOL** base mat! All sport-functional properties, which are always identical due to the fabrication in our factories, remain unchanged!

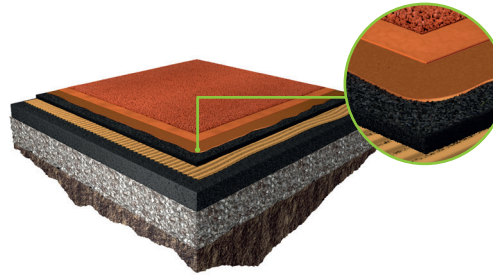

Only the installation time and the budget will be cut!

After bonding the **REGUPOL** base mat, the liquid PUR wear layer is poured directly onto the elastic layer! Thanks to the 4.0 technology, every gram remains on the surface!

Formerly:

Former construction of **REGUPOL** hybrid-sandwich-tracks. The **REGUPOL** base mat is sealed.

New: **REGUPOL champion AG**  
with 4.0 technology

Thanks to the new 4.0 technology, the **REGUPOL** base mat can be coated directly with polyurethane without any intermediate step. This saves time, material and costs.

## THE ADVANTAGES OF **REGUPOL CHAMPION AG** WITH 4.0 TECHNOLOGY

High durability

Faster installation

Installation less  
weather-independent

Cost savings

Low risk of installation
